Creating your flipbook gif in Adobe Photoshop

How to upload all your images into Photoshop onto multiple layers:

1. Open Bridge.
2. Navigate to the directory that your images reside in
3. Select the files. Â You can click and drag around them, or use the shift button to select multiple files.
4. Now in the menu bar select Tools > Photoshop > Load Files into Photoshop layers

Creating Animation:

1. Window> Animation
2. Under animation options> Make Frames from layers
3. Animation options> Select all Frames
4. Click on any time under a frame and adjust time to .1 (you can adjust this later if you need to)
5. Adjust layers and duplicate layers as you see fit.

Saving your project:

1. Save as > lastnameflipbook
2. Save as Web and devices> html and images
3. Save a copy of all three in the Graphics Folder> McArthur Animation> flipbook project
